

Hey docs! Welcome back.

Thank you for taking interest in the next TAF Foundations I & II course here in Center City Philadelphia at my private practice near Rittenhouse Square.

Attached is a course outline. Here is a sizzle reel of the weekend.

<https://www.youtube.com/watch?v=acPHQ66oGU> This will be the third time running the program in the past 14 months and we keep adding new content and cases for review. The shim stock and leaf gauge exercises alone will be pearls that will pay dividends forever.

New Spring dates for the program are Friday and Saturday, June 5th and 6th, 2026. We will finish the second day by 4pm (but I will stay until the last question is answered). You will receive 13 hours of CE.

Friday and Saturday will include breakfast and lunch at the office from some of our best local spots. Friday night is the very special TAF Foundations dinner at the James Beard, award winning chef's table at Vernick Food and Drink. That is a part of the weekend not to be missed and a value-add for foodies and fans alike.

This is a bespoke weekend based on small group learning *in pairs* to better understand the new patient exam and digital photography 101. This is a jumpstart to comprehensive care without compromise (and a possible fee-for-service journey). This is relationship based CE and being part of a community of like-minded individuals. So bring your loupes, bring your camera, bring your cases, and let's collaborate.

I only take **6** spots in total. I do not have another date reserved for the Fall course as of now. Please do not wait to come hang and learn. The price for the weekend course is \$3995. Signing up prior to Super Dental Boost Camp on 4.24.26 saves you \$250 off the tuition. If you would like to reserve a spot, please respond to this email directly and I will send you a link for a \$1000 down payment reservation. Full tuition will be due by May 8, 2026. I will also take a waitlist this time around.

Thanks again for the consideration. I can promise you lifelong value for the things you will bring back to the office. If you are interested in hearing directly from past students and their experiences in the previous two sessions, please reach out for contact information. See below for more of what you should expect from our time together.

With energy and appreciation,
Todd

WHAT our course participants are looking for:

- Learn how to show patients the value in fee-for-service dentistry, driven by a comprehensive, relationship-based approach to service

- Be inspired, with expertise and confidence, to experience a different way of doing dentistry. Gain an external perspective and reassurance about what you are already doing right

WHY you will appreciate working with us:

- Small group classes, mentorship and personal access
- A relatable, peer-led approach that feels realistic and attainable - the idea of soft skills as something that can be learned and improved
- Practical tools and in-person opportunities to try out new approaches to care in a low-risk setting
- The opportunity to see inside a practice and how it works

HOW you benefit from being here:

- The ability to network and confer with peers, evolving into a community of like-minded individuals and support
- A new perspective on how to build your practice into a fee-for-service model
- Gain new success skills (thanks Paul) and the confidence to use them
- An inside look into running a business that you do not get in dental school
